PROFILE SUMMARY

QA Automation Test Engineer with hands-on experience in Manual and Automation Testing of web applications using **Selenium WebDriver, Playwright, Java, TestNG, SQL, and API Testing**. Experienced in designing, developing, and maintaining automation frameworks using the **Page Object Model (POM)**. Strong expertise in **Functional, Regression, Smoke, Sanity, Cross-Browser, and User Acceptance Testing (UAT)** within an **Agile Scrum** environment.

Skilled in preparing **Test Scenarios, Test Cases, and Test Data**, developing reusable automation scripts, validating databases using **MySQL**, performing **REST API Testing** using **Postman**, and tracking defects using **Jira**. Proficient in collaborating with cross-functional teams to ensure the delivery of high-quality software while adhering to **Software Development Life Cycle (SDLC)** and **Software Testing Life Cycle (STLC)** processes.

PROFESSIONAL HIGHLIGHTS

- Around **1 year of experience** in Manual and Automation Testing of web applications.
- Hands-on experience in **Selenium WebDriver with Java, TestNG, Maven, and Playwright with TypeScript**.
- Experienced in designing, developing, and maintaining **Page Object Model (POM)** and **Hybrid Automation Frameworks**.
- Proficient in **Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Integration Testing, System Testing, User Acceptance Testing (UAT), and Cross-Browser Testing**.
- Experienced in preparing **Test Scenarios, Test Cases, Test Data, Test Execution Reports, and Defect Reports**.
- Good understanding of **Software Development Life Cycle (SDLC)** and **Software Testing Life Cycle (STLC)**.
- Hands-on experience in **REST API Testing** using **Postman**.
- Proficient in **SQL (MySQL)** for database validation and backend testing.
- Experienced in **defect tracking, reporting, and lifecycle management** using **Jira**.
- Hands-on experience with **Git** for source code management and version control.
- Good understanding of **Agile Scrum methodology**, including **Sprint Planning, Daily Stand-up Meetings, Sprint Reviews, Sprint Retrospectives, and Defect Management**.
- Strong analytical, problem-solving, communication, and team collaboration skills with the ability to work effectively in a fast-paced Agile environment.

COMPANY EXPERIENCE

QA Automation Test Engineer

Gravity Automation Pvt. Ltd. – Noida, India.
June 2025 – Present.

Roles & Responsibilities -

- Working as a **QA Automation Test Engineer**, performing Manual and Automation Testing for web-based applications.
- Developed, executed, and maintained automation test scripts using **Selenium WebDriver with Java, TestNG, and Playwright with TypeScript**.
- Designed, developed, and maintained **Page Object Model (POM)** and **Hybrid Automation Frameworks** to improve script reusability, scalability, and maintainability.
- Performed **Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Integration Testing, System Testing, User Acceptance Testing (UAT), and Cross-Browser Testing**.
- Analyzed **Business Requirement Documents (BRD)** and **Functional Requirement Specifications (FRS)** to prepare **Test Scenarios, Test Cases, Test Data, and Test Execution Plans**.
- Executed manual and automated test cases to validate application functionality against business requirements.
- Logged, tracked, and verified software defects using **Jira**, ensuring timely resolution in collaboration with the development team.
- Performed **SQL (MySQL)** database validation to verify data integrity and application accuracy.
- Performed **REST API Testing** using **Postman** and validated API requests and responses.
- Used **Git** for source code management, version control, and team collaboration.
- Participated in **Agile Scrum** ceremonies, including Sprint Planning, Daily Stand-up Meetings, Sprint Reviews, Sprint Retrospectives, Backlog Grooming, and Sprint Demos.
- Collaborated with Developers, Business Analysts, and QA team members to ensure the successful delivery of high-quality software.
- Prepared **Test Execution Reports, Automation Execution Reports, Defect Summary Reports, and Daily Status Reports**.
- Enhanced automation framework stability, improved code reusability, and increased overall automation test coverage.
- Performed root cause analysis of failed test cases and updated automation scripts based on application changes.
- Followed QA best practices, testing standards, and coding guidelines to ensure the delivery of high-quality software releases

EDUCATION

- **Bachelor of Arts (B.A.)**
 - **Intermediate – Uttar Pradesh Board**
 - **High School – Uttar Pradesh Board**
-

CERTIFICATIONS

- Automation Testing
 - Selenium WebDriver with Java
 - Playwright Automation with TypeScript
 - REST API Testing using Postman
 - SQL (MySQL)
-

TECHNICAL SKILLS

Category	Skills
Programming Languages :	Java, JavaScript, SQL
Manual Testing :	SDLC, STLC, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Integration Testing, System Testing, User Acceptance Testing (UAT)
Automation Tools :	Selenium WebDriver, Playwright
Automation Frameworks :	TestNG, Page Object Model (POM), Hybrid Framework
API Testing :	REST API, Postman
Build Tool :	Maven
Version Control :	Git
Defect Tracking Tool :	Jira
Database :	MySQL
Libraries :	Apache POI
IDE :	Eclipse, Visual Studio Code
Operating Systems :	Windows, Linux, macOS

PROJECT DETAILS

Project: Salesforce CRM – Sales & Customer Management System

Role: QA Automation Test Engineer

Company: Gravity Automation Pvt. Ltd.

Client: Global Retail Solutions Inc. (USA)

Environment: Windows, Java, Selenium WebDriver, TestNG, Maven, MySQL

Tools & IDE: Eclipse, Maven, Jira, Git

Testing Framework: Hybrid Framework using Page Object Model (POM)

Project Description

Salesforce CRM is a cloud-based **Customer Relationship Management (CRM)** application used to manage **Leads, Accounts, Contacts, Opportunities, Cases, Products, and Customer Information**. The application enables Sales and Customer Support teams to manage customer relationships, sales activities, and business processes efficiently.

Roles & Responsibilities

- Analyzed **Business Requirement Documents (BRD)** and **Functional Requirement Specifications (FRS)** to understand business requirements.
- Prepared **Test Scenarios, Test Cases, Test Data, and Test Execution Plans** based on functional requirements.
- Performed **Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, User Acceptance Testing (UAT), and Cross-Browser Testing**.
- Developed, executed, and maintained automation test scripts using **Selenium WebDriver with Java and TestNG**.
- Designed and maintained **Page Object Model (POM)** based Hybrid Automation Framework.
- Executed automation test suites and analyzed **Test Execution Reports**.
- Performed **SQL (MySQL)** database validation to verify data integrity and application accuracy.
- Performed **REST API Testing** using **Postman** and validated API request and response data.
- Logged, tracked, and verified software defects using **Jira**, ensuring timely resolution with the development team.
- Participated in **Agile Scrum** ceremonies, including Sprint Planning, Daily Stand-up Meetings, Sprint Reviews, Sprint Retrospectives, and Backlog Grooming.
- Collaborated with Developers, Business Analysts, and QA team members to ensure the successful delivery of high-quality software.
- Maintained reusable automation scripts using **Page Object Model (POM)** and followed automation best practices.
- Followed **Software Testing Life Cycle (STLC)** processes and QA standards to ensure the delivery of high-quality software releases.

PERSONAL DOSSIER

Father's Name : Mr. Dinesh Bind

Date of Birth : 30-08-2002

Languages Known : English, Hindi

Current Location : Noida, Uttar Pradesh
